

100 Aptitude Questions & Answers

A Complete Campus Placement Preparation Guide

- 40 Quantitative Aptitude Questions with Shortcut Explanations
- 30 Logical Reasoning Questions with Pattern Breakdown
- 30 Verbal Ability Questions emphasizing Core Grammar Rules
- Designed for campus recruitment elimination rounds
- Includes step-by-step solutions for self-assessment

Generated by AI Resume Analyzer Placement Guide Module

Date: June 2026

SECTION: QUANTITATIVE APTITUDE

Q1. If the price of a commodity increases by 11%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 7.91%

B) 9.91%

C) 11.41%

Correct Answer: B Explanation: Formula: $\text{Reduction\%} = [R / (100 + R)] * 100$. Here $R = 11\%$. $\text{Reduction} = [11 / 111] * 100 = 9.91\%$.

Q2. A can complete a work in 14 days and B can complete the same work in 21 days. How many days will they take to complete the work working together?

A) 7.90 days

B) 9.20 days

C) 8.40 days

Correct Answer: C Explanation: Using LCM method: Total Work = $\text{LCM}(14, 21) = 294$. Efficiency of A = 21, B = 14. Combined efficiency = 35.

Q3. A car travels at a speed of 33 km/h and covers a distance in 2 hours. If the speed is increased to 43 km/h, how much time will it take to cover the same distance?

A) 1.53 hours

B) 2.03 hours

C) 1.28 hours

Correct Answer: A Explanation: Distance = Speed * Time = $33 * 2 = 66$ km. New Speed = 43 km/h. New Time = Distance / New Speed = 1.53 hours.

Q4. A merchant buys an item for \$220. At what price should he sell the item to gain a profit of 15%?

A) \$243.00

B) \$268.00

C) \$253.00

Correct Answer: C Explanation: Profit = 15% of \$220 = \$33.00. Selling Price = Cost Price + Profit = $\$220 + \$33.00 = \$253.00$.

Q5. Two numbers are in the ratio 1:2. If 5 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 40

B) 15

C) 20

Correct Answer: C Explanation: Let numbers be x and $2x$. Given: $(x + 5) / (2x + 5) = 2/3$. Solving this: $3(x + 5) = 2(2x + 5) \Rightarrow 3x + 15 = 4x + 10 \Rightarrow x = 5$. Sum = $x + 2x = 3x = 15$.

Q6. If the price of a commodity increases by 16%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 11.79%

B) 13.79%

C) 15.29%

Correct Answer: B Explanation: Formula: $\text{Reduction\%} = [R / (100 + R)] * 100$. Here $R = 16\%$. $\text{Reduction} = [16 / 116] * 100 = 13.79\%$.

Q7. A can complete a work in 12 days and B can complete the same work in 24 days. How many days will they take to complete the work working together?

A) 7.50 days

B) 8.80 days

C) 8.00 days

Correct Answer: C Explanation: Using LCM method: Total Work = $\text{LCM}(12, 24) = 24$. Efficiency of A = 2, B = 1. Combined efficiency = 3.

Q8. A car travels at a speed of 38 km/h and covers a distance in 4 hours. If the speed is increased to 48 km/h, how much time will it take to cover the same distance?

A) 3.17 hours

B) 3.67 hours

C) 2.92

Correct Answer: A Explanation: Distance = Speed * Time = $38 * 4 = 152$ km. New Speed = 48 km/h. New Time = Distance / New Speed

Q9. A merchant buys an item for \$245. At what price should he sell the item to gain a profit of 10%?

A) \$259.50

B) \$284.50

C) \$269

Correct Answer: C Explanation: Profit = 10% of \$245 = \$24.50. Selling Price = Cost Price + Profit = \$245 + \$24.50 = \$269.50.

Q10. Two numbers are in the ratio 1:2. If 10 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 80

B) 30

C) 40

Correct Answer: C Explanation: Let numbers be x and 2x. Given: $(x + 10) / (2x + 10) = 2/3$. Solving this: $3(x + 10) = 2(2x + 10) \Rightarrow 3x + 30 = 4x + 20 \Rightarrow x = 10$. Sum = 30.

Q11. If the price of a commodity increases by 21%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 15.36%

B) 17.36%

C) 18.8

Correct Answer: B Explanation: Formula: Reduction% = $[R / (100 + R)] * 100$. Here R = 21%. Reduction = $[21 / 121] * 100 = 17.36\%$.

Q12. A can complete a work in 10 days and B can complete the same work in 15 days. How many days will they take to complete the work working together?

A) 5.50 days

B) 6.80 days

C) 6.00

Correct Answer: C Explanation: Using LCM method: Total Work = LCM(10, 15) = 150. Efficiency of A = 15, B = 10. Combined efficiency = 25. Days = 150 / 25 = 6.

Q13. A car travels at a speed of 43 km/h and covers a distance in 3 hours. If the speed is increased to 53 km/h, how much time will it take to cover the same distance?

A) 2.43 hours

B) 2.93 hours

C) 2.18

Correct Answer: A Explanation: Distance = Speed * Time = $43 * 3 = 129$ km. New Speed = 53 km/h. New Time = Distance / New Speed

Q14. A merchant buys an item for \$270. At what price should he sell the item to gain a profit of 20%?

A) \$314.00

B) \$339.00

C) \$324

Correct Answer: C Explanation: Profit = 20% of \$270 = \$54.00. Selling Price = Cost Price + Profit = \$270 + \$54.00 = \$324.00.

Q15. Two numbers are in the ratio 1:2. If 15 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 120

B) 45

C) 60

Correct Answer: C Explanation: Let numbers be x and 2x. Given: $(x + 15) / (2x + 15) = 2/3$. Solving this: $3(x + 15) = 2(2x + 15) \Rightarrow 3x + 45 = 4x + 30 \Rightarrow x = 15$. Sum = 45.

Q16. If the price of a commodity increases by 26%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 18.63%

B) 20.63%

C) 22.1

Correct Answer: B Explanation: Formula: $\text{Reduction\%} = [R / (100 + R)] * 100$. Here $R = 26\%$. $\text{Reduction} = [26 / 126] * 100 = 20.63\%$.

Q17. A can complete a work in 14 days and B can complete the same work in 18 days. How many days will they take to complete the work working together?

A) 7.38 days

B) 8.68 days

C) 7.88

Correct Answer: C Explanation: Using LCM method: Total Work = LCM(14, 18) = 252. Efficiency of A = 18, B = 14. Combined efficiency

Q18. A car travels at a speed of 48 km/h and covers a distance in 2 hours. If the speed is increased to 58 km/h, how much time will it take to cover the same distance?

A) 1.66 hours

B) 2.16 hours

C) 1.41

Correct Answer: A Explanation: Distance = Speed * Time = $48 * 2 = 96$ km. New Speed = 58 km/h. New Time = Distance / New Speed =

Q19. A merchant buys an item for \$295. At what price should he sell the item to gain a profit of 15%?

A) \$329.25

B) \$354.25

C) \$339

Correct Answer: C Explanation: Profit = 15% of \$295 = \$44.25. Selling Price = Cost Price + Profit = $\$295 + \$44.25 = \$339.25$.

Q20. Two numbers are in the ratio 1:2. If 20 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 160

B) 60

C) 80

Correct Answer: C Explanation: Let numbers be x and 2x. Given: $(x + 20) / (2x + 20) = 2/3$. Solving this: $3(x + 20) = 2(2x + 20) \Rightarrow 3x + 60 = 4x + 40 \Rightarrow x = 20$. Sum = 60.

Q21. If the price of a commodity increases by 31%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 21.66%

B) 23.66%

C) 25.1

Correct Answer: B Explanation: Formula: $\text{Reduction\%} = [R / (100 + R)] * 100$. Here $R = 31\%$. $\text{Reduction} = [31 / 131] * 100 = 23.66\%$.

Q22. A can complete a work in 12 days and B can complete the same work in 21 days. How many days will they take to complete the work working together?

A) 7.14 days

B) 8.44 days

C) 7.64

Correct Answer: C Explanation: Using LCM method: Total Work = LCM(12, 21) = 252. Efficiency of A = 21, B = 12. Combined efficiency

Q23. A car travels at a speed of 53 km/h and covers a distance in 4 hours. If the speed is increased to 63 km/h, how much time will it take to cover the same distance?

A) 3.37 hours

B) 3.87 hours

C) 3.12

Correct Answer: A Explanation: Distance = Speed * Time = $53 * 4 = 212$ km. New Speed = 63 km/h. New Time = Distance / New Speed =

Q24. A merchant buys an item for \$320. At what price should he sell the item to gain a profit of 10%?

A) \$342.00

B) \$367.00

C) \$352

Correct Answer: C Explanation: Profit = 10% of \$320 = \$32.00. Selling Price = Cost Price + Profit = \$320 + \$32.00 = \$352.00.

Q25. Two numbers are in the ratio 1:2. If 25 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 200

B) 75

C) 100

Correct Answer: C Explanation: Let numbers be x and 2x. Given: $(x + 25) / (2x + 25) = 2/3$. Solving this: $3(x + 25) = 2(2x + 25) \Rightarrow 3x + 75 = 4x + 50 \Rightarrow x = 25$. Sum = $x + 2x = 3x = 75$.

Q26. If the price of a commodity increases by 36%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 24.47%

B) 26.47%

C) 27.9

Correct Answer: B Explanation: Formula: Reduction% = $[R / (100 + R)] * 100$. Here R = 36%. Reduction = $[36 / 136] * 100 = 26.47\%$.

Q27. A can complete a work in 10 days and B can complete the same work in 24 days. How many days will they take to complete the work working together?

A) 6.56 days

B) 7.86 days

C) 7.06

Correct Answer: C Explanation: Using LCM method: Total Work = LCM(10, 24) = 240. Efficiency of A = 24, B = 10. Combined efficiency = 34. Days = $240 / 34 = 7.06$.

Q28. A car travels at a speed of 58 km/h and covers a distance in 3 hours. If the speed is increased to 68 km/h, how much time will it take to cover the same distance?

A) 2.56 hours

B) 3.06 hours

C) 2.31

Correct Answer: A Explanation: Distance = Speed * Time = $58 * 3 = 174$ km. New Speed = 68 km/h. New Time = Distance / New Speed = $174 / 68 = 2.56$ hours.

Q29. A merchant buys an item for \$345. At what price should he sell the item to gain a profit of 20%?

A) \$404.00

B) \$429.00

C) \$414

Correct Answer: C Explanation: Profit = 20% of \$345 = \$69.00. Selling Price = Cost Price + Profit = \$345 + \$69.00 = \$414.00.

Q30. Two numbers are in the ratio 1:2. If 30 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 240

B) 90

C) 120

Correct Answer: C Explanation: Let numbers be x and 2x. Given: $(x + 30) / (2x + 30) = 2/3$. Solving this: $3(x + 30) = 2(2x + 30) \Rightarrow 3x + 90 = 4x + 60 \Rightarrow x = 30$. Sum = $x + 2x = 3x = 90$.

Q31. If the price of a commodity increases by 41%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 27.08%

B) 29.08%

C) 30.5

Correct Answer: B Explanation: Formula: Reduction% = $[R / (100 + R)] * 100$. Here R = 41%. Reduction = $[41 / 141] * 100 = 29.08\%$.

Q32. A can complete a work in 14 days and B can complete the same work in 15 days. How many days will they take to complete the work working together?

A) 6.74 days

B) 8.04 days

C) 7.24

Correct Answer: C Explanation: Using LCM method: Total Work = LCM(14, 15) = 210. Efficiency of A = 15, B = 14. Combined efficiency

Q33. A car travels at a speed of 63 km/h and covers a distance in 2 hours. If the speed is increased to 73 km/h, how much time will it take to cover the same distance?

A) 1.73 hours

B) 2.23 hours

C) 1.48

Correct Answer: A Explanation: Distance = Speed * Time = 63 * 2 = 126 km. New Speed = 73 km/h. New Time = Distance / New Speed

Q34. A merchant buys an item for \$370. At what price should he sell the item to gain a profit of 15%?

A) \$415.50

B) \$440.50

C) \$425

Correct Answer: C Explanation: Profit = 15% of \$370 = \$55.50. Selling Price = Cost Price + Profit = \$370 + \$55.50 = \$425.50.

Q35. Two numbers are in the ratio 1:2. If 35 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 280

B) 105

C) 140

Correct Answer: C Explanation: Let numbers be x and 2x. Given: $(x + 35) / (2x + 35) = 2/3$. Solving this: $3(x + 35) = 2(2x + 35) \Rightarrow 3x + 105 = 4x + 70 \Rightarrow x = 35$

Q36. If the price of a commodity increases by 46%, by what percent must a consumer reduce the consumption of the commodity so that his expenditure remains constant?

A) 29.51%

B) 31.51%

C) 33.0

Correct Answer: B Explanation: Formula: Reduction% = $[R / (100 + R)] * 100$. Here R = 46%. Reduction = $[46 / 146] * 100 = 31.51\%$.

Q37. A can complete a work in 12 days and B can complete the same work in 18 days. How many days will they take to complete the work working together?

A) 6.70 days

B) 8.00 days

C) 7.20

Correct Answer: C Explanation: Using LCM method: Total Work = LCM(12, 18) = 36. Efficiency of A = 3, B = 2. Combined efficiency

Q38. A car travels at a speed of 68 km/h and covers a distance in 4 hours. If the speed is increased to 78 km/h, how much time will it take to cover the same distance?

A) 3.49 hours

B) 3.99 hours

C) 3.24

Correct Answer: A Explanation: Distance = Speed * Time = 68 * 4 = 272 km. New Speed = 78 km/h. New Time = Distance / New Speed

Q39. A merchant buys an item for \$395. At what price should he sell the item to gain a profit of 10%?

A) \$424.50

B) \$449.50

C) \$434

Correct Answer: C Explanation: Profit = 10% of \$395 = \$39.50. Selling Price = Cost Price + Profit = \$395 + \$39.50 = \$434.50.

Q40. Two numbers are in the ratio 1:2. If 40 is added to both numbers, their ratio becomes 2:3. Find the sum of the original numbers.

A) 320

B) 120

C) 160

Correct Answer: C Explanation: Let numbers be x and $2x$. Given: $(x + 40) / (2x + 40) = 2/3$. Solving this: $3(x + 40) = 2(2x + 40) \Rightarrow 3x + 120 = 4x + 80 \Rightarrow 3x - 4x = 80 - 120 \Rightarrow -x = -40 \Rightarrow x = 40$. So, the numbers are 40 and 80 .

SECTION: LOGICAL REASONING

Q41. If in a certain code language 'HELLO' is written as 'JGNNQ', how will 'WORLD' be written in that code language?

- A) YQTXX B) YQTNF C) YQT

Correct Answer: B Explanation: Each letter of the word is shifted forward by 2 characters. W(+2)->Y, O(+2)->Q, R(+2)->T, L(+2)->N, D(+2)->F

Q42. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

- A) Grandmother B) Sister C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is

Q43. Find the next number in the series: 5, 13, 21, 29, 37, ?

- A) 43 B) 45 C) 53

Correct Answer: B Explanation: The series increases by a constant difference of 8 at each step. Next term is $37 + 8 = 45$.

Q44. If in a certain code language 'HELLO' is written as 'IFMMP', how will 'WORLD' be written in that code language?

- A) XPSXX B) XPSME C) XPS

Correct Answer: B Explanation: Each letter of the word is shifted forward by 1 character. W(+1)->X, O(+1)->P, R(+1)->S, L(+1)->M, D(+1)->E

Q45. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

- A) Grandmother B) Sister C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is

Q46. Find the next number in the series: 5, 16, 27, 38, 49, ?

- A) 58 B) 60 C) 71

Correct Answer: B Explanation: The series increases by a constant difference of 11 at each step. Next term is $49 + 11 = 60$.

Q47. If in a certain code language 'HELLO' is written as 'LIPPS', how will 'WORLD' be written in that code language?

- A) ASVXX B) ASVPH C) ASV

Correct Answer: B Explanation: Each letter of the word is shifted forward by 4 characters. W(+4)->A, O(+4)->S, R(+4)->V, L(+4)->P, D(+4)->H

Q48. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q49. Find the next number in the series: 5, 19, 33, 47, 61, ?

A) 73

B) 75

C) 89

Correct Answer: B Explanation: The series increases by a constant difference of 14 at each step. Next term is $61 + 14 = 75$.

Q50. If in a certain code language 'HELLO' is written as 'KHOOR', how will 'WORLD' be written in that code language?

A) ZRUXX

B) ZRUOG

C) ZRU

Correct Answer: B Explanation: Each letter of the word is shifted forward by 3 characters. W(+3)→Z, O(+3)→R, R(+3)→U, L(+3)→O, D(+3)→G.

Q51. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q52. Find the next number in the series: 5, 22, 39, 56, 73, ?

A) 88

B) 90

C) 107

Correct Answer: B Explanation: The series increases by a constant difference of 17 at each step. Next term is $73 + 17 = 90$.

Q53. If in a certain code language 'HELLO' is written as 'JGNNQ', how will 'WORLD' be written in that code language?

A) YQTX

B) YQTNF

C) YQT

Correct Answer: B Explanation: Each letter of the word is shifted forward by 2 characters. W(+2)→Y, O(+2)→Q, R(+2)→T, L(+2)→N, D(+2)→F.

Q54. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q55. Find the next number in the series: 5, 25, 45, 65, 85, ?

A) 103

B) 105

C) 125

Correct Answer: B Explanation: The series increases by a constant difference of 20 at each step. Next term is $85 + 20 = 105$.

Q56. If in a certain code language 'HELLO' is written as 'IFMMP', how will 'WORLD' be written in that code language?

A) XPSXX

B) XPSME

C) XPS

Correct Answer: B Explanation: Each letter of the word is shifted forward by 1 character. W(+1)→X, O(+1)→P, R(+1)→S, L(+1)→M, D(+1)→E.

Q57. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q58. Find the next number in the series: 5, 28, 51, 74, 97, ?

A) 118

B) 120

C) 143

Correct Answer: B Explanation: The series increases by a constant difference of 23 at each step. Next term is $97 + 23 = 120$.

Q59. If in a certain code language 'HELLO' is written as 'LIPPS', how will 'WORLD' be written in that code language?

A) ASVXX

B) ASVPH

C) ASVPH

Correct Answer: B Explanation: Each letter of the word is shifted forward by 4 characters. W(+4)→A, O(+4)→S, R(+4)→V, L(+4)→P, D(+4)→H.

Q60. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q61. Find the next number in the series: 5, 31, 57, 83, 109, ?

A) 133

B) 135

C) 161

Correct Answer: B Explanation: The series increases by a constant difference of 26 at each step. Next term is $109 + 26 = 135$.

Q62. If in a certain code language 'HELLO' is written as 'KHOOR', how will 'WORLD' be written in that code language?

A) ZRUXX

B) ZRUOG

C) ZRUOG

Correct Answer: B Explanation: Each letter of the word is shifted forward by 3 characters. W(+3)→Z, O(+3)→R, R(+3)→U, L(+3)→O, D(+3)→G.

Q63. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q64. Find the next number in the series: 5, 34, 63, 92, 121, ?

A) 148

B) 150

C) 179

Correct Answer: B Explanation: The series increases by a constant difference of 29 at each step. Next term is $121 + 29 = 150$.

Q65. If in a certain code language 'HELLO' is written as 'JGNNQ', how will 'WORLD' be written in that code language?

A) YQTX

B) YQTNF

C) YQT

Correct Answer: B Explanation: Each letter of the word is shifted forward by 2 characters. W(+2)->Y, O(+2)->Q, R(+2)->T, L(+2)->N, D(+2)->F

Q66. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q67. Find the next number in the series: 5, 37, 69, 101, 133, ?

A) 163

B) 165

C) 197

Correct Answer: B Explanation: The series increases by a constant difference of 32 at each step. Next term is $133 + 32 = 165$.

Q68. If in a certain code language 'HELLO' is written as 'IFMMP', how will 'WORLD' be written in that code language?

A) XPSXX

B) XPSME

C) XPS

Correct Answer: B Explanation: Each letter of the word is shifted forward by 1 character. W(+1)->X, O(+1)->P, R(+1)->S, L(+1)->M, D(+1)->E

Q69. Pointing to a man, a woman says, 'His mother is the only daughter of my father.' How is the woman related to the man?

A) Grandmother

B) Sister

C) Mother

Correct Answer: C Explanation: The woman's father's only daughter is the woman herself. Her mother is the woman. Thus, the woman is the mother of the man.

Q70. Find the next number in the series: 5, 40, 75, 110, 145, ?

A) 178

B) 180

C) 215

Correct Answer: B Explanation: The series increases by a constant difference of 35 at each step. Next term is $145 + 35 = 180$.

Q71. Find the error in the sentence: 'Neither the manager (A) / nor the employees (B) / was present at the meeting (C) / yesterday (D).'

A) Part A

B) Part B

C) Part C

Correct Answer: C Explanation: Rule of Proximity: 'nor employees' is plural, so the verb should be plural 'were present' instead of 'was present'.

Q72. Choose the word that is closest in meaning (synonym) to 'ABUNDANT':

A) Scarcity

B) Plentiful

C) Sparingly

Correct Answer: B Explanation: Abundant means existing or available in large quantities; overflowing. 'Plentiful' is the closest synonym.

Q73. Complete the sentence with the correct preposition: 'She has been working in this office for the last 8 months.'

A) since

B) for

C) from

Correct Answer: B Explanation: We use 'for' to denote a duration of time (e.g. for the last X months), whereas 'since' is used for a specific point in time.

Q74. Find the error in the sentence: 'Neither the manager (A) / nor the employees (B) / was present at the meeting (C) / yesterday (D).'

A) Part A

B) Part B

C) Part C

Correct Answer: C Explanation: Rule of Proximity: 'nor employees' is plural, so the verb should be plural 'were present' instead of 'was present'.

Q75. Choose the word that is closest in meaning (synonym) to 'ABUNDANT':

A) Scarcity

B) Plentiful

C) Sparingly

Correct Answer: B Explanation: Abundant means existing or available in large quantities; overflowing. 'Plentiful' is the closest synonym.

Q76. Complete the sentence with the correct preposition: 'She has been working in this office for the last 11 months.'

A) since

B) for

C) from

Correct Answer: B Explanation: We use 'for' to denote a duration of time (e.g. for the last X months), whereas 'since' is used for a specific point in time.

Q77. Find the error in the sentence: 'Neither the manager (A) / nor the employees (B) / was present at the meeting (C) / yesterday (D).'

A) Part A

B) Part B

C) Part C

Correct Answer: C Explanation: Rule of Proximity: 'nor employees' is plural, so the verb should be plural 'were present' instead of 'was present'.

Q78. Choose the word that is closest in meaning (synonym) to 'ABUNDANT':

A) Scarcity

B) Plentiful

C) Sparingly

Correct Answer: B Explanation: Abundant means existing or available in large quantities; overflowing. 'Plentiful' is the closest synonym.

Q79. Complete the sentence with the correct preposition: 'She has been working in this office for the last 14 months.'

A) since

B) for

C) from

Correct Answer: B Explanation: We use 'for' to denote a duration of time (e.g. for the last X months), whereas 'since' is used for a specific point in time.

Q80. Find the error in the sentence: 'Neither the manager (A) / nor the employees (B) / was present at the meeting (C) / yesterday (D).'

A) Part A

B) Part B

C) Part C

Correct Answer: C Explanation: Rule of Proximity: 'nor employees' is plural, so the verb should be plural 'were present' instead of 'was present'.

Q81. Choose the word that is closest in meaning (synonym) to 'ABUNDANT':

A) Scarcity

B) Plentiful

C) Sparingly

Correct Answer: B Explanation: Abundant means existing or available in large quantities; overflowing. 'Plentiful' is the closest synonym.

Q82. Complete the sentence with the correct preposition: 'She has been working in this office for the last 17 months.'

A) since
